Green, Not Concrete: More than 5000 Students Form Human Chain In Gurugram To Protect Aravali Biodiversity Park

Gurugram school students come together for a peaceful protest against the National Highway Authority of India's proposal to build Delhi- Gurugram highway that is expected to destroy the Aravali Biodiversity Park

Air Pollution, Haryana | Written By: [Aishwarya Upadhyay](#) | Edited By: [Sonia Bhaskar](#) | November 16, 2018 10:47 AM | [Q](#) [D](#)

..."Human chain of children is symbolic for the future of this country, which belongs to the children and they stand together for saving the environment. It is very senseless to destroy a green area which reduces pollution in the world's most polluted city, just to build space for more pollution causing activities. Children and wildlife can't exist happily on a highway", says Verhaen Khanna, Founder, New Delhi Nature Society.

THE OPTIMIST CITIZEN

BHOPAL | 31 OCTOBER 2018

WWW.THEOPTIMISTCITIZEN.COM

This Delhi based commercial pilot is bringing back your connectedness with nature out of the ramblings of Facebook

By Austin Dsouza 4 min

The scenic masquerade of an evening greets hazy eyes with warm hues. This is to say, that the colours of an evening are enchanting, while the display is beyond mesmerizing beauty. It would have been a picturesque moment if we were to sit in the damp grass watching colours dissolve into the stillness of the night. Then again, Instagram has the same scenic benevolence framed in multiple filters, so why waste an evening away from the socials of the internet? To this, Mr Verhaen Khanna, a commercial pilot and the founder of 'New Delhi Nature Society' holds a contradictory viewpoint.

In his meticulous journey of experimentation and rediscovering the blissfulness of nature in the bosom of Delhi, he attests that his exploits have led to the synchronization of his sleep cycle with the sun and he spends his precious time connecting with nature while rolling in the damp grass. The founder of NDNS maintains that true appreciation of nature and connectivity to the same lies in experiencing nature first hand and not through the ramblings of Facebook or other such inventions of the internet age. He further sheds light on the fact, that the continued association to the online world has led to serious aberrations such as tree blindness, resulting in an individual being oblivious to the presence of a tree leading up to fatal accidents. These among other reasons are furnished by the founder as the primary motivations behind the inception of the 'New Delhi Nature Society'.

While this seems trivial to any trained mind, Mr Khanna lays stress on the fact that it is not. To support his summations, he recounts a meeting with a 17-year-old Delhi boy, who has never touched a tree in his entire life. Thus, he attests that the aim of NDNS is to spread awareness about nature and it involves the nature lovers of Delhi. The efforts of the NDNS also include nature festivals, providing a platform for musicians artists, rescue operations

of cats, birds and cows and extinguishing harmful polluting fires in collaboration with the fire department. All these activities are managed by volunteers and full-time team members. The organization further aims to appoint nature rangers to carry forward the love of nature.

The NDNS, in its infancy, started out as a small social media group facing difficulties of breaking communication barriers, social conditioning and finding like-minded people while bargaining with social atrocities that opposed this line of thought. The next mode of action as described by the founder includes a nature warrior course and a tree ambulance to rescue trees in the works. The founder asserts importance on activities like tree climbing and other nature-centric activities make the participants aware of trees, curing them of tree blindness. He believes when you hug a tree you realize that they have been here before you, while in retrospect of this belief he maintains that the best time to plant a tree is 20 years ago, the second best time is now.

The Times Of India

After Justice Gita Mittal now Justice Bakhrui comes to rescue of Delhi residents from ill conceived projects of NBCC and MoHUA.

IIT REPORT RAISES QUESTIONS OVER POTENTIAL TRAFFIC ISSUES

Explain where you'll get water from or E Kidwai Nagar project a no-go: HC

Abhinav.Garg@timesgroup.com

New Delhi: Delhi high court asked the New Delhi Municipal Council on Thursday to state the source and extent of water supply need for the East Kidwai Nagar redevelopment project, even as an IIT report raised questions about potential traffic congestion in the area.

Justice Vibhu Bakhrui made it clear to project operator National Buildings Construction Corporation (NBCC) that till the court was convinced its concerns about water supply and traffic congestion were addressed, it wouldn't allow further allotment.

At the next hearing, the court will study a report prepared by IIT Delhi under professor Goetam Tiwari that found NBCC may have underestimated vehicle use by those who will work/live in the redeveloped East Kidwai Nagar as also the impact on traffic circulation in the area because it relied on a 2010 traffic survey.

While the report says that FAR for the project is within

WHAT IIT REPORT STATES

- Master Plan 2021 complied with on mixed-land use and FAR
- Estimate of traffic impact not clear as 2010 vehicular estimates relied upon
- Personal motorised trips to Aurobindo Marg and Ring Road
- Poor connectivity to public transport

the norms under the Master Plan Delhi 2021, the parking capacity is higher than recommended, thus incentivising the use of personal vehicles over public transport.

The court's questions came after Delhi Jal Board counsel Sumet Pushkarna submitted NDMC hadn't as yet approached it for water supply. Even if it does, DJB is already beset with logistical constraints and will be unable to give additional water,

Pushkarna said. Earlier, NDMC had conceded that it was dependent fully on DJB for water.

NBCC said it was installing an effluent treatment plant and could generate water beyond the NDMC supply to meet the needs of residents. The court, however, said it needed to verify first how NDMC intended to supply water and if that entailed restricting supply to other areas in its jurisdiction.

When NDMC said it could arrange 2,400 kilolitres per day of water for the new commercial and residential complex while conceding the demand would be for 3,700 kilolitres, the court asked, "What is your scheme, where will you take out the water from? How much was the supply to the area before the project?"

"There is no clarity on how the requirement of water will be met and further the question about whether adequate arrangement for traffic has been made also persists," the court observed, while restraining NBCC from going ahead with fresh allotments in the meantime.

The court was hearing a petition filed by some residents of South Extension, among them senior advocate Aman Lekhi and advocate Manali Singhal. They had challenged "the reckless decisions of the authorities to further develop the area by launching new large-scale residential and commercial projects in an already saturated vicinity that has no scope for further development".

The Times of India

Breathless in Delhi, students & activists protest for clean air

Niharika Lal | TNN | Updated: Nov 10, 2018, 16:07 IST

Young protestors came out in large numbers to express their concerns

Demanding their right to breathe fresh air, hundreds of Delhiites recently protested outside the Ministry of Environment, Forest and Climate Change (MoEFCC). While some protesters shouted slogans, others sang songs, appealing to the ministry to take immediate measures to stop the pollution. Other than activists, parents and school children were also part of the protest.

Residents of Delhi NCR gathered outside the Ministry of environment, forests and climate change to raise their voice about the inaction of the government regarding the current state of Air Pollution.

People of all ages are suffering and dying, so we need to see some action now, no point waiting till 2050.

URBAN

World Trade Centre Project at Nauroji Nagar Flouts Delhi Master Plan Regulations

It would appear that government agencies feel free to brazenly re-interpret Delhi Master Plan's regulations to suit their convenience.

Digging through the current High Court order for the #7GPRA projects and instructions to NBCC. Please note that **NONE OF THE 7 PROJECTS HAVE BEEN APPROVED BY THE COURT.**

The court has asked NBCC to seek fresh approvals from the Delhi State Environment Impact Assessment Authority (SEIAA) which will critically examine the environment impact such a project may have. Obv, this **DOES NOT MEAN THAT THE PROJECTS HAVE BEEN APPROVED ALREADY.**

All projects including those earlier approved by the SEIAA are no longer individual projects but form one 'single urban project' hence approval shld be reviewed as a fresh project and not as 'reconsideration' of their EC. And, **NONE OF THE PROJECTS HAVE BEEN APPROVED BY COURT.**

Delhi State Environment Impact Assessment Authority (SEIAA) is responsible for critically examining the cumulative environ. impacts of the project e.g. on air quality & biodiversity loss before granting EC. **NONE OF THE PROJECTS HAVE GOT THIS CLEARANCE YET.**

In addition to EC, the #GPRA project needs to get tree cutting permissions from the Delhi Tree Authority. **NO TREE CUTTING PERMISSIONS HAVE BEEN GIVEN TO THE PROJECT YET.** And we hope that the Tree Authority will not function as a permit giving machinery.

Traffic management approval for the area is to be given by UTTIPEC at the project approval stage. But no detailed traffic study has been completed and submitted so far for this area, **HENCE NO TRAFFIC APPROVALS HAVE BEEN GIVEN TO THE #GPRA PROJECT YET.**

In addition to EC, tree felling permissions & traffic approval, NBCC needs to get approval from DelhiJalBoard for the amount of fresh water needed after the redevelopment is done. **THE PROJECT HAS NOT RECEIVED THE FRESH WATER SUPPLY APPROVAL YET.**

Without these approvals NO further construction activity or felling of trees can be carried out in Nauroji Ngr, Netaji Ngr, Saroini Nagar, Thyagaraj Nagar, Mohammedpur, Kasturba Nagar or Srinivaspuri Pl note.

In an interview given to BloombergQuint, DrAK_Mittal says that 6 out of 7 redevelopment projects have received a nod from the Delhi High Court. **THIS IS OBJECTIVELY INCORRECT. NONE OF THE PROJECTS CAN GO THROUGH WITHOUT NECESSARY APPROVALS.**

Desi Bird Eating Desi Grass
Teaching us an important lesson
(Red Munia)

Birding Nature Walk

Participants traveled from all over Delhi NCR to Visit Okhla Bird Sanctuary with NDNS.

The weather was really amazing and we identified dozens of bird species.

Using a bird book and binoculars, the participants were able to notice some migratory birds as well.

The Red Munia was the main highlight of the walk. The participants were awstruck by this natural beauty.

Join us for future walks, follow the events on our FB page or whatsapp 9711115666.

Greenzones of Delhi

Now that temperatures are cooler, we can start visiting the beautiful green areas of Delhi. Whatsapp 9711115666 if you are interested to join the nature walks or stay tuned to the events page on our website and social media pages.

Things to do, if a tree is being cut :

- Click pictures
- Tell them to stop immediately
- Ask them to show the Forest Department permission letter
- No permission, then Call 100 and wait till help arrives.
- Write a letter to the APCCF and CC to the DCF of your area.
- If they have permission, take the supervisors details who must be present there and contact the Forest Department .

**ALL
TREES
MATTER**

AQI smart monitors set up all over the country.

www.aqi.in has set up Air Quality Index monitors which give 24x7 live feedback about the PM 2.5, PM 10, Humidity, Temperature and Noise level.

New Friends Colony has a monitor setup at **New Delhi Nature Society HQ** by **AQI India**.

Citizens of Delhi Raise voices on Pollution

While the ministry of environment forests and climate change celebrates a clean air week for only 5 days, the citizens of Delhi NCR gathered to raise their voice about the suffering inflicted on them due to no action from the government. People came out to voice their concerns in many ways.

Raoul Kerr, a Delhi based rapper, was present in the gathering and he rapped about the air pollution in Delhi.

The crowd absolutely loved it !

Bee Hive Rescue

A Bee Hive with the harmless bees were rescued in NFC which were in a bucket on the roadside with some men who were selling the honey.

The hive was placed back on a tree in a park.

COW RESCUE

We rescued this injured cow in NFC with the help of many local people and the ambulance from Dhyan Foundation.

How humans are killing themselves

Hanging in balance

1 Hubballi-Ankola Railway Line
Distance 163 km - Passes through two protected areas: tiger reserve, elephant corridor

2 Doubling of Tinal Ghat-Castle Rock Railway Line
Total distance between Goa and Londa is 97 km (80 km in Goa and 17 km in Karnataka). Estimated cost of project is 1,198 crore. Trees to be cut between Anavur-Tinal Ghat - **15,890**.

3 Widening of Sirsi-Kumta State Highway
Total distance - 50 km. 15,072 trees to be cut for the widening and trees on 71.42 ha will be 'trimmed' to allow street lights. Proposal to upgrade six other state highways to NH under the Sagar Mala project.

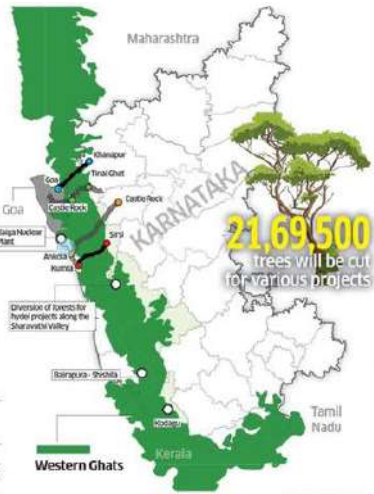

4 Widening of National Highway 4A phase two: 50 km stretch between Khanapur and Goa border, passes through elephant corridor; **22,622** trees to be cut.

Evergreen forests in Uttara Kannada shrunk from 34.63% in 1973 to 5.22% in 2013

- Rehabilitation projects are undertaken inside the Western Ghats by clearing forest areas.
- The district has seen several protests against development projects. While they succeeded in preventing some projects, the government had the last laugh in most of the cases.
- New projects are either not participatory or have poor mitigation measures.
- Environmentalists claim that the government is misusing the Forest Rights Act to benefit rich and influential people, while the tribal people are losing out.

Development of ports: Belval, Andoli, Karwar, Talsi and Ankola

Impact: Destruction of habitats, Cargos and trucks carrying excavated minerals will impact the sensitive ecology of the Western Ghats.

20+ linear Projects in this area require the need to cut 21 lakh Trees.

More than a dozen trees felled in Lajpat Nagar I Block by some evil residents at I 86 (near Andhra bank).

When the police arrived, these ladies started beating the complainant.

No tree cutting permission was at the location.

The policeman suddenly denied seeing the ladies beating the complainant. Instead the police has accepted a complaint from the resident against the complainant for taking pictures in public.

If you are wondering why is Delhi the most polluted city on earth, it's because of people like these and pathetic policemen.

If You Ever Wanted To See An Example Of Irony, You Should Have Been In Delhi for Diwali. (Click here for Full Article)

After Supreme Court Banned Fireworks, thousands of people in Delhi burnt fireworks.

Some of them burnt fireworks with a pollution mask on.

The lady in the picture is helping her children burn fireworks and all 3 of them have masks on.

08 REPORT FROM TI'S AUTOPSY mid-day Tuesday, November 23, 2018 | www.mid-day.com | twitter.com/mid_day | epaper.mid-day.com

The state said TI was shot while she was charging at the lion.

After the autopsy, the body was burnt in a funeral pyre adjacent to the post-mortem room.

SHOOTING FROM BEHIND IS NOT SELF-DEFENCE

mid-day accesses the report from tigress TI's post-mortem that concludes she was facing the other way when shooter fired at her

A CORRESPONDENT
mid-day.com

THE state claims that tigress TI was shot in self-defence but didn't get what the pictures from the post-mortem say.

mid-day first accessed the post-mortem witness report, which concludes that TI "was facing away from the person who fired the bullet."

The report includes diagrams and pictures to support this conclusion and another, equally incriminating. Finding — the state emboldened in the left though did not appear to have been fired from a

translating rifle, since there was no damage to the underlying tissue and the syringe was only embedded superficially. This conclusion is in line with the witness allegations that the tiger's shooting was not in self-defence, and the body may have been dressed up with the tranquilliser to cover up the killing.

The post-mortem witness report, filed by wildlife biologist Mihir Paritwika, on behalf of the Maharashtra Forest Department, is in direct contradiction to the state's claim that the tigress was shot while she was charging at the lion.

Bullet trajectory is at an oblique angle to the axis of the body.

Bullet lodged in right shoulder.

Bullet entry point.

State report on shooting

In its report on the November 2 shooting, the state had said that Anshu Ali, son of controversial scamster Nawal Shafiq Ali Khan, shot at the tigress while she was charging at the lion. "When certain about the identity [of the tiger], a team member attempted a shot that hit in her back the tigress moved back and charged at the lion, which was in a corner. As an act of self-defence, Mr Anshu fired from a distance of about 8-10 m. The tigress died on the spot."

AUTOPSY DETAILS	Start time	End time	Weight	Body length	Body weight	Tail length	Chest girth
	2PM, Nov 3	5PM, Nov 3	119kg	259cm	91cm	107cm	

The left flank of the tigress, displaying the bullet's entry point near the shoulder and the tranquilliser shot on the left thigh.

This picture was taken after killing. The skin flap over the left thigh, where the tranquiliser was injected, is shown in a separate flap. Further, there is no wound on the left thigh. The report states, "Clut from a sprayer projector (translating rifle) always leaves a significant and obvious wound, which was not observed in this case." Secondly, the tranquiliser (bullet) in the left thigh is clearly visible in the sub-cutaneous layer. Lack of penetration into underlying muscle layer also visible. Translating rifle usually shoot death at great force, leaving a deep wound in the tissue.

The autopsy experts remove a flap of skin from the tigress's left flank to show the bullet hole, and right: a close-up view of the bullet's entry point during close look.

"The entry point, place where bullet was lodged, and the trajectory of the bullet show that the animal was facing away from the person who fired the bullet!"

Mihir Paritwika, wildlife biologist, in the post-mortem witness report.
