Environment Day Celebration at Ryan International School

NDNS founder Verhaen Khanna was invited to Ryan International School on August 1 for their Environment Day celebration, where he engaged with students on the importance of conservation and environmental responsibility. The session brought together young minds eager to learn about the natural world, with Mr. Khanna sharing insights from his years of hands-on conservation work and encouraging students to see themselves as active participants in protecting the environment.

The visit aimed to inspire the next generation to look beyond textbooks and develop a genuine curiosity for nature, reinforcing the idea that environmental stewardship begins with awareness and grows through action. For NDNS, such school engagements remain a vital part of building long-term ecological consciousness among the youth.

Tree Plantation drive with Manav Bharti School

INDNS organized a tree plantation drive at Tughlakhabad Biodiversity Park in collaboration with Manav Bharti School, bringing students together for a hands-on lesson in environmental responsibility.

Armed with saplings and enthusiasm, the young participants got their hands dirty by planting trees, learning firsthand about the role each one plays in supporting local ecosystems and combating climate change. The initiative aimed to instill a sense of ownership and connection to nature early on, encouraging students to see conservation not as a distant concept but as something they can actively contribute to.

Fireflies Workshop

For over fifteen years, NDNS has been running its firefly workshop, taking small groups into the habitat to keep the delicate ecosystem undisturbed.

The 45-minute monsoon-season program offers a rare glimpse into the firefly's life cycle — from an egg stage of one to two months, to a larvae stage spent in the soil for up to a year and a half, before a fleeting adult phase of just 30 to 45 days.

Of the more than 2,000 firefly species worldwide, nearly 60% are found in India, though this workshop showcases just one — the Pteroptyx. Strict rules ensure no one catches or takes fireflies home, preserving the experience for future visitors. Yet despite these precautions, firefly numbers have declined significantly over the years, largely due to rising light pollution and increasing footfall near the habitat — a quiet reminder of how fragile such ecosystems truly are.

Register Now

Nature-Walk at Aravali Biodiversity Park

NDNS recently organized a nature walk at Aravali Biodiversity Park, bringing together people of all ages to explore one of Delhi's finest examples of ecological restoration. Once a barren, mined landscape, the park now thrives with native plants and trees that have helped revive the rocky Aravalli terrain and its biodiversity. Participants learned about local flora, the importance of conservation, and how such green spaces play a vital role in a rapidly urbanizing city — a reminder that even damaged landscapes can heal with sustained care.

[Watch Now](#)

Meteor Shower at Forest Spirit Learning

NDNS organized a meteor shower viewing session at Forest Spirit Learning, timed with the peak of the Perseid meteor shower in mid-August. Participants of all ages gathered under the night sky, away from the city's light pollution, to witness one of the year's most spectacular celestial events, with streaks of light flashing across the darkness as Earth passed through debris left behind by the Swift-Tuttle comet.

The experience offered more than just a visual spectacle — it was a chance to slow down, look up, and reconnect with the vastness of the universe, fostering a sense of wonder often lost amid daily routines. Guided insights into the science behind meteor showers helped participants appreciate the delicate mechanics of our solar system, while the peaceful, forested setting of Forest Spirit Learning added to the immersive, reflective nature of the evening.

For many, it was a rare reminder of how much natural beauty still exists beyond the reach of city lights.

The jungles next door

Monsoon transforms Delhi's green pockets into lush urban jungles waiting to be explored, with fungi-filled trails, glowing fireflies, croaking frogs and seasonal wildlife. Here's how to explore the Capital's unique wild monsoon magic before the season slips away

Adrika Soodar

NOCTURNAL HERPING
Earth Walks by Anurag Kumar is a Delhi-based organization that organizes night walks in the city's green spaces. The walks are led by Anurag Kumar and are open to all ages. The walks are held on a regular basis and are a great way to explore the city's green spaces at night.

MUSHROOM FORAGING WALKS
Led by foraging expert Manish Malik, these weekend foraging walks take you through the city's green spaces and are a great way to learn about the different types of mushrooms that grow in the city. The walks are held on a regular basis and are a great way to explore the city's green spaces at night.

FIREFLY NIGHT WALKS
Hidden in plain sight, fireflies are a common sight in the city's green spaces during the monsoon. The walks are led by Anurag Kumar and are open to all ages. The walks are held on a regular basis and are a great way to explore the city's green spaces at night.

Citizens unite to voice concerns over proposed Deer Translocation

New Delhi Nature Society and several animal lover groups launched a campaign to protect the captive spotted deer of A.N. Jha Deer Park, Hauz Khas.

The petition has received an encouraging response from the public.

On 19 April 2026, concerned citizens, students, teachers, and representatives from various organizations gathered outside the park to oppose the proposed relocation of the deer to tiger-inhabited reserves in Rajasthan.

Participants urged authorities to adopt compassionate and science-based wildlife management and ensure the safety and well-being of the deer within their current habitat.

Tree Care

HOW TO SAVE FALLEN TREES

When a tree falls down for any reason like storm, pruning, construction, etc. instead of removing them, efforts should be made to restore the tree back to its original location.

HOW TO SAVE A FALLEN TREE

Standard Operating Procedures

Scan this QR code for more details

OR

Tree Care in the Colony

Do you have trees in your society?

No → Plant Trees

Yes → Are the trees cemented?

Yes → Remove the cement around the trees

No → Are there any wires/nails/boards on the tree?

Yes → Remove them

No → Pour Water around the trees and spread leaf compost around the trees

Tree Line- The tree line is the row of trees planted along roads, and boundary walls. It helps keep the colony green, cool, and full of life.

What is a gap in the tree line? A gap means a tree has fallen, dried, or been illegally removed and hasn't been replaced.

What Can You Do? Residents can plant a native tree in the empty spot, especially during monsoon. With basic care like watering and composting, the tree line can be restored and kept healthy.

Illegal Activities and Penalties

Driving nails into trees causes internal wounds, making them vulnerable to disease, decay, and even death.
Penalty is Rs 10,000/-

Wrapping or hanging wires around trees constricts growth, damages the bark, and can lead to electric hazards or slow tree death.
Penalty is Rs 10,000/-

Fixing boards onto trees is illegal. Trees are not advertising spaces. Defacing public property is a crime.
Penalty is Rs 10,000/-

Digging Within 1 Metre of Trees damages roots, causes stress, and can destabilize the tree. It's illegal and harmful.
FIR will be filed against the person/department involved.

Cementing Around Tree Base (Within 1 Metre) blocks water and air from reaching roots. It suffocates trees, prevents them from growing wider and weakens them structurally. Forest department will charge the penalty based on the damage caused.

[Open Pdf](#)

Help Trees & Animals

The Hon'ble National Green Tribunal (NGT), Principal Bench, New Delhi in O.A. No. 62 of 2013 Aditya, N. Prasad & Ors. v Union of India & Ors., vide its Order dated 23.04.2013 directed,

"In the meanwhile, we direct all the public authorities, more particularly Municipal Corporation of Delhi, DDAs, DTC, DMRC, NHAI and all Government respondents in this petition including the Director General of CPWD, the Chief Engineer, PWD, to ensure that:

1. All the sign boards, names, advertisements, any kind of boards or signages, electric wires and high tension cables or otherwise are removed from the trees forthwith.
2. They shall also ensure that the concrete surrounding the trees within one metre of the trees are removed forthwith and all the trees are looked after well and due precaution is taken in future so that no concrete or construction or repaving work is done at least within one metre radius of the trunk of trees. The Vice-Chairperson, the Commissioner, the Chief Engineer, the Director General and all other senior most officers of the Departments/authorities concerned shall be personally responsible for carrying out this order.
3. The Departments/authorities concerned shall take all and every prohibitive measures to prevent the defoliation of the trees in any manner whatsoever, save only its trimming in accordance with law.
4. All the respondents whose boards are fixed on the trees shall be prosecuted by the respective authorities under in accordance with the relevant law."

Nails on trees

Wires on trees

Signboards on trees

Cementing within 1 meter of trees

Digging within 1 meter of trees

Green Helpline : 011-23378513

TREE CARE

1. Remove cement around the tree, soil space around the tree should not be less than 1 meter on all sides.
2. Remove nails, wires and signboards from trees.
3. In case of holes in the tree caused by nails, you can put wet soil in the injured parts of the tree.
4. Ensure no digging or construction is done within 1 meter of trees.
5. Give water to trees daily.
6. In the forest, trees shed their leaves on the soil floor, those leaves mix with the soil and turn into nutrition for the tree roots to absorb. But around the city streets, all the fallen leaves are swept away, so the trees are not receiving that important nutrition from the fallen leaves. This is why it is extremely important to put leaf compost around trees, to make the trees strong and healthy.
7. If you see a tree cut, or with nails, wires, signboards on it or if the tree is cemented within 1 meter, then please call the Green Helpline and report the issue with the exact location, then they will send you the complaint number by SMS for you to follow up.

HOW TO SAVE FALLEN TREES

HOW TO CONDUCT A TREE CENSUS :

1. Number on the Tree :
2. Common name of the tree :
3. Location of the tree :
4. Girth (in cms) :
5. Approximate height (in ft) :
6. Health of the tree :
(D-Dry, H-Healthy, I-Infected, L-Lopped, NI-Nails, Ch-Tree guard chocking)
7. Width of open soil around the tree :
(A- Up to 1 ft, B- 1 to 2 ft, C- 2 ftft, D-4ft, E- Over 5ft)
8. Ground condition, outside the open soil :
(S- loose soil, C- cemented, M-metalized, T-filled)
9. Remark:
